What you put on your skin penetrates and can enter your body. First of all, if you want to reduce your stretch marks, you may want to consider trying to stimulate the circulation of the skin. Doing so will help the blood to get to the skin, which can help with healing the area as well as reducing the appearance of your stretch marks. Some ways to do this include using a skin brush or a loofah to brush your skin regularly. The majority of hemorrhoid sufferers can be treated without any type of surgery. The first thing to do is to relieve the symptoms. Sitz baths are recommended. Sit in the bath, with a few inches of warm water fifteen minutes two to three times a day. Instead of wiping the area with toilet paper, use pads that are pre-moistened with witch hazel, or cotton balls soaked in witch hazel instead. Make sure the area is dry. If the steps above don't help relieve the symptoms, you can try the application of an over-the-counter hemorrhoidal cream to the area which will also help relieve itching and burning.

Note that a food's acid or alkaline-forming tendency in the body has nothing to do with the actual pH of the food itself. For example, lemons are very acidic, however the end-products they produce after digestion and assimilation are very alkaline so lemons are alkaline-forming in the body. If the wart is resistant to your treatment, your physician may
